

Modern Payments for Wholesalers

Invoices Paid. Cash flow Secured. Time Recovered

Pinch wants to get you paid easier, here's how...

Invoices Paid

Now you can get paid via a credit card directly from your Xero or DEAR invoice. Everything is updated automatically. We'll even show other open invoices for your customer to settle their balance with you in a single click.

Cash flow secured

Most stockists would prefer to pay "on account", but up until now it's always been on their terms. Now you can store card data securely on file and have payments automatically deducted when an invoice becomes due. This gives you a predictable cash flow cycle and reduces the admin of chasing payments.

Time Recovered

Talking of reducing admin...we got that covered in more ways. With our comprehensive integration with Xero we will automatically reconcile payments, track undeposited funds and a few other things that only your accountant could get excited about. Trust us though, we'll save you heaps of time.
